

Dermapen™ CLINICAL PATIENT PRE-TREATMENT FORM

Dermapen™ is a corrective treatment that creates rejuvenating micro-channels into the skin's matrix. Employing patented technology, Dermapen's™ oscillating action effortlessly glides over the skin to initiate and stimulate the body's own natural healing and regenerative response. It is possible to achieve striking results by delivering a versatile and customized treatment, which has been documented to improve the appearance of aging, wrinkles, uneven skin tone, uneven texture, stretch marks and scar tissue on face and body areas. Dermapen™ treatments are fast, effective, comfortable and offer results after just one treatment. Based on your areas of concern, your Dermapen™ practitioner may recommend a series of treatment for optimal results. Your Dermapen™ clinical treatment only uses genuine Dermapen™ devices and is performed by a Dermapen™ qualified practitioner.

CONTRAINDICATIONS:

Dermapen™ treatments are not suitable for patients experiencing active

- Papulopustular rosacea
- Acne vulgaris stage III-IV
- Herpes simplex
- Warts
- Scleroderma
- Bacterial/fungal infections
- Open lesions
- Solar keratosis
- Skin cancer
- Hemophilia
- Pregnancy

PRECAUTIONS/CONSIDERATIONS:

Certain health conditions, medications, supplements and lifestyle factors may affect a Dermapen™ procedure. All patients are required to complete a Dermapen™ Consultation Form prior to any clinical treatment for assessment by a qualified Dermapen practitioner.

If you are prone to herpes simplex (cold sores), it is recommended to take or apply a targeted prophylaxis, such as acyclovir, to prevent a possible outbreak.

For tanned to dark complexions or skins prone to post-inflammatory hyper-pigmentation, it is recommended to use a melanin inhibiting skin regime for at least 2 weeks prior to a Dermapen™ clinical treatment. Dermapen™ recommends the twice daily application of DP Dermaceuticals Brite Lite™.

COMFORT:

Your Dermapen™ practitioner will take all steps to ensure total comfort for your Dermapen™ procedure. If at any point you feel discomfort, please inform your practitioner immediately. If you have any allergies or have had any past reaction to topical numbing cream or anesthetic, **please inform your Dermapen™ practitioner prior to treatment.**

HEALTH & SAFETY:

Your Dermapen™ treatment only uses sterile, single use consumables throughout the procedure, ensuring complete health and safety.

TREATMENT DURATION:

Please allow 45-90 minutes for your Dermapen™ clinical treatment including preparation, numbing and post-care.
